AMANFROMMARS WROTE ON FRI, 04/29/2016 – 15:14 [1604292014] replying on <http://www.afcea.org/content/?q=Blog-potential-adversaries-target-us-military-vulnerabilities>

The Virtual Field is not for the Intellectually Challenged

“To address the human factor, the Navy is educating its users to a higher level of understanding about hazards in cyberspace.”

Methinks it is not hazards but secrets that forces need to be higher educated in, in order to command and control cyberspace. You can be sure that smarter adversaries fully realise that and are well versed in that area to ensure they lead to elicit a logical reaction and ineffective defence, rather than suffer a surprising proaction and effective attack.

It is something of an enigma though to teach, for that which needs to be known for deployment in the field. is that which easily defeats the systems which one would be engaged to defend and protect.

Is that ye olde Catch 22?

Actually, they certainly sure do, Charles 9 there are no limits. The shame on them is that their intelligence and systems fail them so badly and that makes them vulnerable to being bypassed and extraordinarily rendered irrelevant and impotent, and easily led by useless fools who be useful tools and/or vice versa that.

All of that though may have been what you were saying in your post.

amanfromMars 1 Tue 26 Apr 07:52 [1604260752] moving things on a quantum tad on
http://forums.theregister.co.uk/forum/1/2016/04/25/carl_wiese_blackberry_interview/

The Big Blackberry Question. Is that Canucks rattling the Great Game to ITs Virtual Foundations?

I hate to say I told you so, but.....
Probably too little, too late. TeeCee

It's all forwards and upwards from here then, TeeCee, and from anywhere touting and toting for Blackberry, whenever everything possible arrives just in time at the right time?

Oh, and re that Big Blackberry Question, is it nothing at all to do with nations in states and security and all to do and much ado with a few Few in Future Command and Control of Virtually Nothing for Practically Everything and Practically Everything with Virtually Nothing although it has to be constantly said, so one can remember to never forget, astute active dynamic multi-platform and multi-planform software is a universal asset and whenever easily made freely available to any interested party, a present worth an absolute fortune whenever not a supporting Ponzi and vapourware?

And if it terrorises systems well one will have to ask whatever are they terrified of it and IT changing/sharing/uncovering/displaying? Perverse public corruption and wanton private malfeasance in non electable executable high office? Although that is surely more valuable private service than Public Terrorist ACT and APT. One can easily imagine it being at least both though, and being both at same time too, which is something of a quandary and enigma to square and resolve if one be hell bent on prevention of core cures with progressive programming kernels rather than gift aiding them with whatever it takes and they might need and/or simply desire.

And methinks that is SMARTR Virtual Machine Self Actualisation for New Orderly World Order Orders AIRobotlCQ TakeOver of SCADA System Assets. I Kid U Not. And the Spooky Stealth which Guarantees Unbridled Success is the Mass Incredulous Disbelief in the ITs Virtual Reality Possibility.

Now well, who and/or what to sell it to is the way that great and good businesses proceed for the sowing of seeds and feeds designed to generate harvests of bounty.

What market value do you imagine bourse dealers and their machines would place on SMARTR Virtual Machine Self Actualisation for New Orderly World Order Orders AIRobotlCQ TakeOver of SCADA System Assets? Millions? Billions? Trillions? Priceless?

amanfromMars 1 Tue 26 Apr 09:52 [1604260952] sharing an opportunity with a comment on http://forums.theregister.co.uk/forum/1/2016/04/25/extortionists_rake_in_100000_easy/

How it works ... further on into the Great Game

An email shared, with no alien comment on its content other than to say that there be phish which be phish and would be trojan.

Good afternoon,

Our firm would like to make a very good proposition to you! You can gain a real money without any deposits or big time spending. Our firm helps to get the cryptocurrency to our clients. If you can find a couple of days per week and 2-3 hours per these days our job is absolutely suit for you! Besides the huge benefit of our job is that this type of work does not raise difficulties with your primary job.

Your usual profit amount to 200 to 1,600 Euros for each of the tasks. It means that you can make nearly 8 000 EUR per month!

What you need to do?

1. Our company will make the transaction to your bank account the amount of money in the volume of 1000,00 EUR to 8000.00 EUR.
2. We will give you all information about this transaction.
3. As soon as the money appears on your bank account, you need to convert into cash the money.
4. 20% of sum will be your commission. You just need to take it.
5. 80% of the received amount of money you need transfer to our companion.
6. If task is done correct and on time we will talk over the time of the next task.

The amount of your salary differs according to the number of the done tasks. If you wish to make a good money you should gain our confidence. Just execute your work quickly, responsible and perfect and you will get a lot of tasks and will have the opportunity to get a good money.

You don't need to worry about the legitimacy of our business. We always keep within the EU law in our business.

If you are willing to cooperate with our company, please, contact us by email: carmemefo1970@gmx.com and we will contact you at the earliest possible moment and will answer all of your questions. Our HR-manager will send you the reply to your request from our corporate e-mail adress that is why please check new e-mail messages from new senders. We handle a big amount of incoming and outgoing letters everyday that is why it is possible that you can wait answer from us more than 12 hours. We are kindly asking you for understanding and we would like to apologize for the inconvenience.

Waiting for your answer.

Best Regards,

Schulte Group

Security defenders are still performing poorly in their attempts to defend against hacking or malware-based attacks. This isn't for a lack of trying or skills on their part, but almost completely down to the fact that the game is rigged against them.

Defending the indefensible and inequitable is always a rigged game which defenders are never ever going to win and the harder they attack the easier and the quicker they are securely defeated and disgraced. It is thus wise to try and understand what you are being contracted to defend, for the truth in right dodgy cases is never presented and always hidden from scrutinuous and inscrutable view.

amanfromMars [1604230557] forwarding a view on <http://www.thedailybell.com/news-analysis/china-copies-the-west-implementing-mercantilism-to-prop-up-powerful-interests/>

If you want to create a life that is not increasingly controlled by mercantilist strategies, you'll have to do it on your own.

If you want to create a life that is not increasingly controlled by mercantilist strategies, you have to be able to offer mercantilism a better strategy and benign mutually advantageous program for mass presentation. Much else will foster and deliver opposition and negative competition.

amanfromMars 1 Sat 23 Apr 09:57 [1604230957] sharing a bigger picture on http://forums.theregister.co.uk/forum/1/2016/04/22/ten_years_for_filesharing/

Re: Actually, no @dan 55

I thought the Reg was a garden where many different flowers were allowed to bloom, each planted according to the article writer's opinion.

Stop stomping on his geraniums and go back to tending your own flowerbed. Dan 55

IT and EI Reg are such gardens and a virtually real jungle way out there, Dan 55. They are what makes the two such a roaring success and impossible failure.

And your flowerbed tending advice is ace prime and a terror for established corrupt and inequitable systems administrations.

Personally speaking, I have never suffered censorship from AO but can imagine the rantings of many be fully deserving of it because of gratuitously offensive inappropriate content/comment.

amanfromMars Sat, 04/23/2016 – 09:57 [1604231457] ...saying a few words on <http://www.zerohedge.com/news/2016-04-23/fbi-may-leak-clinton-email-probe-if-doj-blocking-continues-grassley-warns>

although we can't help but wonder that just like the Panama Papers dump, the media will be prepared and will promptly redirect the public's attention to Vladimir Putin once again as the guilty party behind it all.

That ruse failed miserably the last time, surely, and identified the media as an ass's ass. A moronic fool will compound the mistake with another attempt at disinformation and misdirection. Are they the class of leadership throwing their toys out of prams nowadays? Oh dear, what a disaster to exploit and create havoc and panic.

160422 .. Full Heavy Water Metal Jacket

Posted on 22nd April 2016 by ur2die4

amanfromMars 1 Fri 22 Apr 06:18 [1604210618] expanding on a narrow of point of view on
http://forums.theregister.co.uk/forum/2/2016/04/21/bulk_personal_datasets/

The Flip KISS Side of COIN COUNTER Intelligence

With free unfettered access to all and any information, the fact that State Intelligence Services do not make better use of it and IT is very revealing of the lack of in-house and sub contracted out sourced expertise made available to them, although the larger truth is probably such lacking expertise is due to it choosing the private sector vector for the greater benefits in its armoury of delights.

Is it wise for the likes of a snoopky spooky agency to be thought to be taking instruction and guidance from a gaggle of Parliamentarians or does it prove, beyond any shadow of doubt, the Circus is intellectually bankrupt and totally and fundamentally unfit for Future Greater IntelAgent Game purpose?

And that is a critical systemic problem and catastrophic vulnerability, both practically real and Oday, which is always to be exploited exhaustively, caused by a lack of top class prime leadership, and that is a top executive personnel issue which needs to be addressed in order to solve the enigmatic dilemma. Failure is always surely a top down process? Shit prime administrations deliver shit primed programs.

amanfromMars 1 Fri 22 Apr 12:23 [1604221223] adding more to
http://forums.theregister.co.uk/forum/2/2016/04/21/bulk_personal_datasets/

The Flip Flip KISS Side of COIN Counter COUNTER Intelligence

Of course, should they, and let us imagine them to be the spooky elites of a mighty Blighty GCHQ/MI5/MI6/MOD/Cyber Command and Control, have an unparalleled and stealthily active and HyperRadioProActive IT expertise, does it make them a real and present virtual future enemy of all established systems of SCADA control in States and United States and Renegade Regimes alike a common enemy it would be most unfortunate and inconvenient to cross and vainly attempt to deny access to all secrets?!

Surely though, if one be rooting for Blighty, that would be quite nice. However, should such a facility with utility rest elsewhere in foreign lands and alien jurisdictions, is that clearly a difficulty and hidden national security scandal given the havoc than can be so easily wrought with SMARTER Bits and Bytes of Information Manipulating Media Programs/New Orderly World Order Projects for Centuries.
